

Building a Forecasting Contest

From Questions to Insights

Dr Josh Tyler

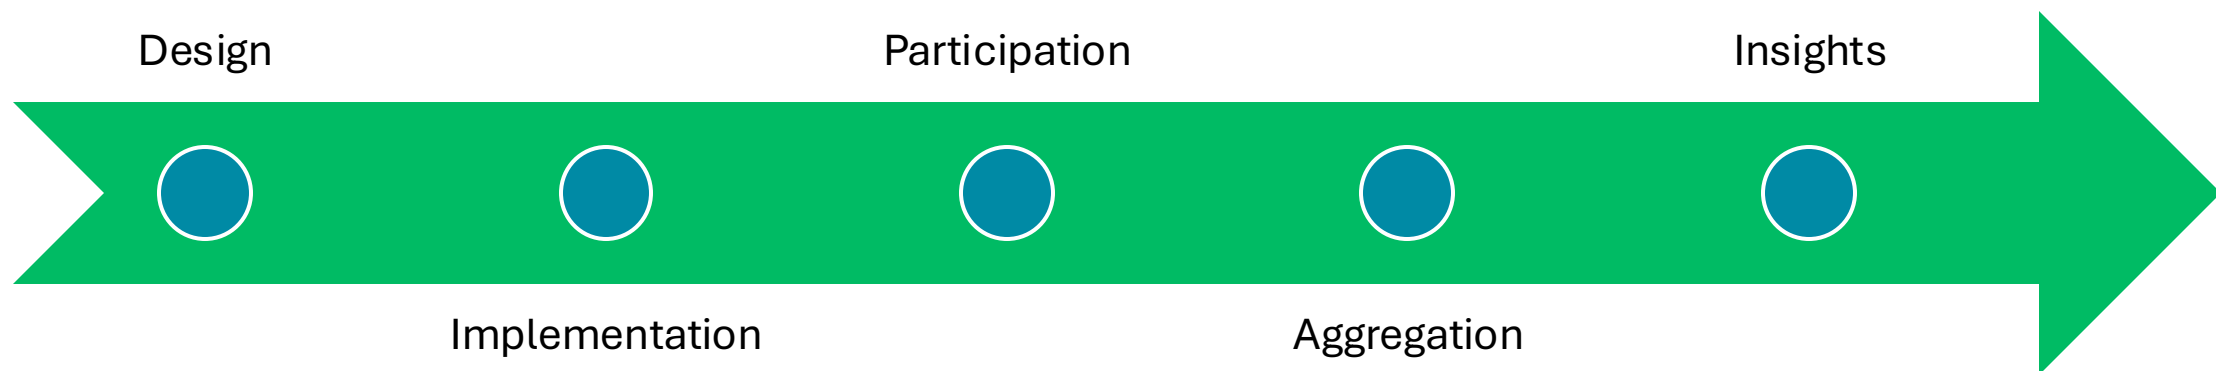

What is a Forecasting Contest?

Journey of a Contest

Considerations

Design

- What are the Key Challenges we want to solve?
- Who will benefit from the forecasts?

Participation

- Do we have a diverse set of teams taking part?
- Do they have enough time?
- How can we best support the teams?

Insights

- What format would create the most impact?
- How can we disseminate the results and maximise impact?

Implementation

- What datasets should we provide?
- Are there any specific strategies/tools we want to see?

Aggregation

- How should we aggregate all the entries?
- Should different methods be given different weights?

Maximising Value to Stakeholders
